Journal of Electroanalytical Chemistry 451 (1998) 275–276

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Ac polarography
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface 151
Alkanethiols
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187
Anion adsorption
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) 199
Au(111) surfaces
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187

Battery cathodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229
2,2′-Bibenzoxazoline
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Biocatalysis
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides 167

Calcium phosphates
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique 235
CdSe
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry 215
Chemically modified electrode
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes 179
Cobalt hydroperoxide
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 161
Complex
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Cooperative phenomena
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187
Covalent attachment
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203
Cysteine oxidation
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine 221

Desorption kinetics
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187
Diffusion impedance
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229
Dithizone
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203

Electrocatalysis
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine 221
Electrochemical redox reaction
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Electrochromic devices
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229
Electrodeposition
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique 235
Electrolyte ions
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface 241
Europium ion
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141

Fluorescence
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Frumkin isotherm
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface 151

Gold electrode
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface 241

HOPG
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine 221
Hydroxyapatite
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique 235

PII S0022-0728(98)000249-6

Insertion electrodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229
Insulin
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface 151
Interfacial charge
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) 199
Interfacial tension
Comments on the thermodynamics of solid electrodes 193
Intermolecular interaction
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187
IR spectroscopy
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface 241
ITO
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203

Lippmann equation
Comments on the thermodynamics of solid electrodes 193

Metal reduction
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides 167
Modified electrodes
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203

Nitroxyl radical
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes 179

Oxidation of alcohol
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes 179
Oxygen reduction
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 161

Peltier coefficient
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry 215
pH-Microsensor
Mechanistic studies of electrodeposition for bioceramic coatings of calcium phosphates by an in situ pH-microsensor technique 235
Photocalorimetry
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry 215
Photocorrosion
Photocorrosion of polycrystalline CdSe in aqueous KOH: an in situ study by photocalorimetry 215
Phthalocyanines
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine 221
Poly(ethylene oxide)
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Polyheme c-type cytochromes
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides 167
Polymer electrodes
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229
Protein adsorption
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface 151

Reaction mechanism
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes 179
Rotating disk electrode
Reaction mechanism and kinetics of alcohol oxidation at nitroxyl radical modified electrodes 179

Self-assembled films
Probability theory of desorption kinetics of self-assembled alkanethiols stabilized with pair interaction 187
Self-assembly
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203
Sensors
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203
Soybean trypsin inhibitor
Adsorption behaviour of insulin and soybean trypsin inhibitor at the mercury | solution interface 151
Spectroelectrochemistry
Spectroelectrochemical studies of tetrasulfonated metallophthalocyanines adsorbed on the basal plane of graphite in the presence of cysteine 221
Surface functional groups
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 161
Surface oxidation
Effects of carbon electrode surface states for the electro-reduction of (hmc)$CoOOH^{2+}$ which is an intermediate during the catalytic reduction of O_2 161
Surface Raman spectroscopy
Electrochemistry of ITO and gold electrodes covalently modified with dithizone and the effect of Cu(II) and Pb(II) ions 203
Surface stress
Comments on the thermodynamics of solid electrodes 193
Linear correlation between surface stress and surface charge in anion adsorption on Au(111) 199

Terpyridine
Electrochemical switching of fluorescence emission between red and blue from complexed europium ions in poly(ethylene oxide) 141
Thin films
Impedance of constant phase element (CPE)-blocked diffusion in film electrodes 229

Voltammetry
Kinetic studies on the electron transfer between bacterial c-type cytochromes and metal oxides 167

Water
In situ IR spectroscopic study of water at a polycrystalline gold electrode surface 241
